

MainStreet Residential Goes Bilingual

February, 2010. MindCross Training announces agreement with e2Value to translate their online courseware to meet the needs of their Canadian market. MindCross will translate the existing courseware into Canadian French and English.

"e2Value is going to introduce their flagship product, MainStreet Residential, to the Canadian insurance market in the summer of 2010. As their online training partner we're very pleased to have the opportunity to translate the current online training" said Rosanne Hutton, Training Specialist for MindCross. "It's an exciting challenge to convert the course and content while still maintaining the quality of the experience for the students".

MindCross has been e2Values training partner since 2008 and provides course development, maintenance and hosting for the e2ValueUniversity.com website. Over 300 students have taken the online course since its release. Students consistently give the course excellent reviews on their evaluations.

Scott Hutton, Managing Partner for MindCross adds *"We appreciate the ongoing confidence that e2Value has shown in MindCross and look forward to working with them on this offering.*

About e2Value

e2Value is a leading provider/innovator of Insurance-to-Value internet applications under the EVS, QCE, eZsketch, and FnR brands. e2Value is the undisputed leader of high-value home estimating products and has pioneered innovation in all other sectors of the Property Industry. e2Value currently provides estimating products for Mainstreet homes, High-Value homes, Manufactured homes, Commercial properties, Farm & Ranch properties. Additionally, e2Value's product lines are enhanced by the industry's only Java based sketcher, electronic forms, digital photo imaging, and workflow automation.
